City of Mount Vernon Street Operations Division Tree Trimming

MOUNT VERNON – The City of Mount Vernon Street Operations Division has begun the process of trimming of trees on most of the city streets in order to allow the street sweeper the ability to sweep all the way to the edge of the roadway. In addition, the tree trimming will clear some obstructed street signs and areas where school buses and large trucks are continually hitting tree limbs.

Private property owners who may choose to address trimming of the trees abutting their property along the City right of way may contact the City of Mount Vernon Public Works Department.

This trimming work is anticipated to occur over the next few months throughout the City, beginning with non-residential areas.
