

**Residential Sewer Billing:**

Sewer billings are based on the water usage data that Skagit PUD supplies to the City of Mount Vernon. Skagit PUD supplies this data to the City every other month for a two month period. The following chart shows what water bill corresponds to the City's sewer bill.

**Residential Sewer Billing Map:**

**Consumption Billing**

<b>PUD Usage Period</b>	<b>Receive PUD data</b>	<b>City Billing Period</b>
November/December	January	February/March
January/February	March	April/May
March/April	May	June/July
May/June*	July	August/September*
July/August*	September	October/November*
September/October*	November	December/January*

\*Summer usage may include irrigation and other non-sewer water usage. To account for this the City uses Winter-time averaging for our billing periods August through January. The system automatically bills the lower of either the winter-time average or actual usage.

The Winter-time average is calculated on usage from November through February.
