

The Library Commons is built as a transportation hub, located right off Interstate 5 and within walking distance of the Skagit Transit Station. With its 76 public EV Charging spaces and infrastructure to support up to 200 EV Charging stations in the future, it is the largest public EV charging station in the country.

Reducing annual CO2 emissions from vehicles is a critical aspect to reducing climate change. All-electric vehicles produce 60-90% less emissions than gasoline powered vehicles.
